Subject: Waste and Hazardous Materials Division

This marks the first working day for the new Waste and Hazardous Materials Division. As acting Division Chief, I will be working with the administrative and program staff of the new division to address the immediate transition priorities until a permanent Division Chief is named.

It is also my pleasure to announce that Karen Shaler has accepted the position as the Waste and Hazardous Materials Division Senior Executive Management Assistant effective September 29, 2002. Karen has worked for the Michigan Department of Public Health and most recently served as Executive Secretary for the former Drinking Water and Radiological Protection Division. Please provide a warm welcome to Karen on Monday September 30, 2002, to our Division.

To the staff of the new Waste and Hazardous Material Division:  
Please continue with the program work and priorities that you have been involved with in the past. I will be meeting frequently with the supervisory staff to address any problem issues as they arise. I know this has been a very frustrating and trying time for all staff within the DEQ, but we need to continue to focus on the programs we have to manage to the best of our ability and make this a positive change for the future. Thanks for your continued cooperation.

Roger Przybysz, Acting Chief  
Waste and Hazardous Materials Division
